COVERS RICHEST GOLD AREA IN CALIFORNIA

Vol. 14, No. 23. The County Seat Paper NEVADA CITY, CALIFORNIA, The Gold Center MONDAY, MARCH 18, 1940.

From the Californian, March 15, 1848:
The Liberty of the Press consists in the right to publish the Truth, with good motives and for justifiable ends. —Alexander Hamilton.

Thinking Out Loud

By H. M. L.

We are in receipt of 25 maps of Finland. They are to be sold at 50 cents each to raise money for the relief of Finnish people and to aid in the reconstruction of Finland's bomb shattered homes, the return of refugees and for hospital care for thousands upon thousands of maimed and wounded soldiers and civilians. The maps are drawn by Finnish cartographers, printed by a Finnish firm in New York, and distributed by the same firm at no cost to the Finnish relief fund. The entire sum raised by the sale of these maps throughout the country goes directly for Finnish relief.

The maps show the whole of Finland, the whole of the Finnish Gulf, the Gulf of Bothnia, part of the Baltic sea, and portions of Russia, Norway and Sweden of strategic importance in the war just closed. The back of the map is devoted to a description of the country, the Finnish people, a brief history of Finland, a short account of its war of independence in 1917, and summaries of its industries, agriculture, fishing and educational system and progress. The whole is a comprehensive story of a courageous, thrifty and industrious people, who deliberately chose a democratic form of government and made it work far better than most democracies do.

Since the map was printed there has come a peace in which the Finns were forced to surrender a considerable portion of their territory. We cannot find words to express our loathing of the Russian dictator and his satraps who first invaded and then forced this peace upon a brave, independent and God fearing nation nearly fifty times smaller than Russia. But we can pause to curse with profound feeling anyone living in the United States who gives his allegiance to the murderouh degenerate in the Kremlin, rather than to the Stars and Stripes.

We do not believe that any American has a right to utter a word of criticism regarding the Allies and their failure to bring adequate aid to the Finns, and much less have we a right to cast approbium on other neutrals. Let us remember that the most powerful neutral and the most powerful nation on earth, with 18 billions of gold buried in the ground, timidly, tardily, proferred Finland a 20 million dollars loan—too late. This is our shame and none of us should have the brazen hardihood to point the finger of scorn at other democracies. In the long run, we predict, we shall pay for the administration's calloused indifference to the fate of Finland.

We do not specially censor the New Deal for playing politics with Finland's need. For seven years the New Deal has played politics with the need of 10,000,000 of our own people, nearly three times the population of Finland. However, dilly-dallying, and shilly shallying are attributes of all politicians of all ages. We believe that the plethora of words of sympathy, and cowardly delay in action might have happened under a half dozen Republican Presidents we call to mind. The pleasure loving and careless Warren Harding no doubt would have been as dilatory in acting. The cautious Calvin Coolidge would have weighed the pros and cons interminably. But we do believe Theodore Roosevelt or Woodrow Wilson would have expressed the will of 98 per cent of the people promptly.

As for the effect of the Russian-Finnish peace on World War No. 2, we think most learned commentators of the past ten days are merely guessing. This peace no doubt, does lean to a German diplomatic victory. But any number of diplomatic victories will not win the war for Germany. So far as Russia's economic partnership is concerned, it still seems to us more a liability than an asset. And one thing, very certainly true, few nations need any longer fear Russian military strength. The Finns surely showed up the Russians.

The war will be won on sea just as all great wars have been won since the Romans burned Carthage. The Allies have the war chests and the ability to keep them filled, and they have a tremendous preponderance of sea power. Germany is doomed to defeat.

W. F. Sharp, state ranger, is in a local hospital recovering from a heart attack.

SALE OF MAPS TO AID FINNISH WOMEN, CHILDREN

The Nugget yesterday received a letter from the General Drafting company, map makers, concerning the sale of Finnish maps and stressing the urgency of further relief for the Finnish people. The letter follows:

General Drafting Co., Inc., Map makers, 21 West Street, New York N. Y.

March 13, 1940.

Mr. H. M. Leete, Editor,
Nevada City Nugget,
Nevada City, California.
Dear Mr. Leete:

At the request of Mr. Guerdon Leete of the Finnish Relief Fund headquarters here I shipped to you yesterday 25 copies of the new map of Finland on consignment.

As no doubt you are aware, everything connected with the production of this map—labor and material — has been contrbiuted free of charge to the Finnish Relief Fund, and in turn all proceeds from its sale go to the Fund without any deduction whatever.

As a native of Finland myself I shall be most grateful for any efforts you make to publicize and dispose of the map in Nevada City. The cessation of hostilities does not lessen the need for relief funds. The entire country has been bombed. It will take years to repair the damage. And in the meantime thousands of civilians are homeless and penniless. Every copy of the map you sell will help some Finnish woman or child. And the map is still a good map, needed by everyone who wants to follow the European news. So please keep on selling them.

Sincerely yours,
OTTO G. LUNDBERG,
President.

IDAHO MARYLAND NET PROFIT IN 1939, $955,171

The Idaho Maryland mines company, Grass Valley gold producer, reports $955,171 net profit for 1939 or 54 cents a share compared to $1,193,446 in 1938 or 67 cents a share on a slightly larger number of shares.

Gold recovery declined to 115,001 counces from 117,267 though tonnage milled was increased. In spite of lower return from mining lower grade ore in the west end of the mine, recovery was the highest of all California mines and second only to the Homestake mine in the United States.

President E. L. Oliver said development work has uncovered a promising vein on the 1,800 level.

"FASHION" SHOW, HOOP CONTEST ON ANTLER PROGRAM

The committe in charge of the Nevada City- Chico Antlers basketball game announced recently that a mock fashion show would be put on by the members of the local organization between the preliminary and feature games of the evening. The games are scheduled for Wednesday at the Nevada City high school gymnasium.

The Antlers will adorn themselves in the latest spring creations for women and show the audience how they should be worn.

Sun-Up Easter Service Begins Sharp at 6 A. M.

Chief of Police Garfield Robson, in charge of arrangements for the Easter Sunrise services, stated that the sun will rise at 6 o'clock on that morning, and asks everyone attending be sure to get there before that time.

Rev. Robert Carrington of Bethany church, Assemblies of God, will assist in the sunrise services Easter morning. Mrs. C. A. Libbey will lead her chorus of fine young voices. The Boy Scouts will direct traffic. As stated before the Rev. D. Ralston will assist with the service.

Mrs. R. J. Berggren and son went to Pasadena Saturday for a visit with relatives.

ELTON TOBIASSEN WINS COAST TITLE IN RECENT BOUTS

Elton Tobiassen, son of Sheriff and Mrs. Carl J. Tobiassen won over Glen Ousley, Washington State, in a boxing match in Sacramento Thursday evening which made him a member of the intercollegiate team. On Friday evening he won a decision over Zingale of Idaho which makes him champion of the Pacific Coast in the 145 pound class in the intercollegiate team. Tobiassen is in a group of 8 victors who will defend the Pacific Coast in the coming bouts.

CHAMBER TOPIC TUESDAY NIGHT FOURTH OF JULY

H. F. Sofge, secretary of the Nevada City Chamber of Commerce, urges every member to attend the meeting in the City Hall tomorrow night as the Fourth of July celebration depends largely on the sentiment shown Tuesday evening. Guerdon Ellis, new supervisor of the Tahoe National forest, will be a guest at the meeting.

RETAIN NEVADA CO. CCC CAMP URGES CHAMBER

Bert Foreman new president of the Nevada City Chamber of Commerce, and H. F. Sofge secretary, motored to Sacramento Saturday and appeared before the conservation committee of the state chamber of commerce requesting that an effort be made to retain Grass Valley CCC camp, which it is reported will be abandoned for lack of money.

Their pleas were that the CCC boys saved the tax payer money in fighting fires. It is believed there were more man made fires before the CCC boys took over, than afterward and the state chamber agreed to send Congressman H. L. Englebright and influential committees in Washington, D. C., telegrams requesting that more money be appropriated to keep the camp in this region.

BRUCE MEDAL IS AWARDED TO U. C. ASTRONOMY PROF.

The Bruce Medal, international award for distinguished accomplishments in the field of astronomy, went this year to Dr. Frederick H. Sears, a former member of the University of California astronomical staff, and the present assistant director of Mount Wilson Observatory. Presentation of the medal was made at a meeting of the Astronomical Society of the Pacific here tonight by Dr. C. Donald Shane, professor of astrophysics in the University and president of the Society.

While the Bruce Medal is of American origin, it may go to an astronomer anywhere who has fulfilled the requirements of the trust which controls the award. It has come to the University of California three times, in 1915 when it was given to Dr. William Wallace Campbell, in 1926 when Dr. Robert G. Aiken was the recipient, and in 1936 when Dr. Armin O. Leuschner was the winner. Dr Sears, this year's winner, was a fellow and instructor in astronomy in the University from 1895 to 1899.

ANNOUNCE WINNERS OF "FLOWER SALE"

At the close of the "Flower Sale" held on Saturday by the American Brotherhood for the Blind, Miss Carol Merrill, who had charge of the headquarters, reports that Sherrie Karkling was entitled to first prize, having secured $9.85. The second prize was won by Dorothy Barsch, who had $7.38. The third winner, Melvin Dodge, had $6.33. The other workers were made happy with movie passes.

The sponsors are grateful to those who worked so faithfully all day, and to everyone who contributed in any way toward the success of this worthy undertaking.

Ludwig Netz returned Sunday from a month's vacation in Arizona and is feeling fine. Mr. and Mrs. Netz have just received a letter from their daughter, Mrs. May Ehler of Martinez that she is enjoying a six week's vacation in Hawaii.

AUTO HITS TREE, BREAKS DRIVER'S LEG AND TREE

Stanley Deal, who lives on Pine street, Grass Valley, returning home in his coupe at 12:30 this morning, ran into a tree along the road a mile below Higgin's corner When the California traffic officers from Grass Valley reached the scene, they found that the car had struck a 20 inch pine tree so hard that bumper, the fenders, lights and radiator, formed a neat half moon around the tree, and that the shock had broken off the upper twelve feet of the tree. Passing autoists took Deal to the Jones Memorial hospital in Grass Valley, where it was revealed that he had suffered a broken leg. The fracture was above the knee.

Deal admitted to the traffic officers that he had consumed five bottles of beer and was traveling approximately at 50 miles an hour.

SCOOP THURMAN GETS NEW POST

Assemblyman Allen G. Thurman, who represents Nevada County in the lower house of the state legislature was this week appointed a member of the interim committee on Governmental Efficiency and Economy by Assembly Speaker Gordon H. Garland.

According to Thurman, this committee will make a thorough study of governmental costs in the state and should as a result, make possible, material savings to the people as well as return the state to a sane, practical and economical system of government.

WITHOUT ZONE LAW COUNCIL HAS NO CONTROL

Information that the council of Nevada City, by its power of withholding business licenses could control business in this community, which is being disseminated locally today was called erroneous by Frank Finnegan, city attorney.

The only control the council has over business here is by the enforcement of the state building code which applies only to the buildings that business firms plan to construct. The council cannot regulate the type of business that proposes to use the structure. Fire ordinances in effect here, enforced by the council, only provide for the control of anything that constitutes a fire hazard. In other words if the zoning ordinance is repealed any business may locate anywhere in town.

LOW COST LEGAL SERVICE PLANNED BY LAWYER GROUP

The low cost legal advice and service for persons of moderate income is the subject of an exhaustive inquiry being conducted by California lawyers, it was revealed yesterday by the office of the State Bar.

Under the direction of Professor Robert E. Stone of the University of California, a State Bar committee has commenced a series of meetings to assemble all available data to determine if there is a social and economic demand for such service. Two meetings have been held in San Francisco by the committee and a third is scheduled for March 19.

"The committee's objective is to determine whether a substantial group within the low income brackets is being deprived of necessary legal advice and assistance," Professor Stone declared. "If it is determined that inadequate service is available, the committee will recommend remedial measures to the State Bar."

WEEK END IN RENO

Mr. and Mrs. Robert Tamblyn enjoyed the big celebration in Reno and Virginia City during the past week end. Nevada State is particularly interesting to the Tamblyn's as Robert's father, W. V. Tamblyn. was the fifth man to enter Tonopah and was also interested in mining in that state years ago. Mr. and Mrs. W. V. Tamblyn did not make the trip on account of the stormy weather.

Underground Dispute Hearing Is Scheduled For Monday, April 22

Much interest has been aroused among Nevada County miners and mining officials by the suit filed by the Empire-Star Mines Company Ltd., against Cooley Butler, Wallace Butler and Fred Kallenborn, operators of the Golden Center Mine, involving an underground dispute in which it is claimed the defendants deliberately drained water from the Golden Center into a winze of the Pennsylvania Mine, operated by the Empire-Star Mines Company for a period of four years.

In addition to asking an injunction restraining the defendants from continuing to permit water to flow from the Golden Center to the Pennsylvania workings, the suit demands damages amounting to $6,500 for injury to the Pennsylvania mine.

Superior Judge George L. Jones of Nevada county will determine whether the Empire-Star is entitled to an order granting its representatives the right to survey and measure the property in dispute.

Temporary Order

Judge Jones has issued a temporary restraining order pending the hearing, which has been set for April 22. The restraining order prevents the defendants from:

1. Constructing or sinking the winze described in plaintiff's complaint as leading from the 1650 level of the Golden Center mine downward to a point in the vicinity of the 2400 level in the Pennsylvania mine.

2. Causing or permitting any water to flow from any of the workings of the Golden Center mine into drill holes leading from the workings of said mine into the workings on and near the 2400 level of the Pennsylvania mine.

3. Drilling any additional drill holes in a direction and to such a depth as will be likely to cause said holes to enter the workings of the Pennsylvania mine on or near the 2400 level thereof.

Supports Claim

Supporting the Empire-Star Company's claim the operators of the Golden Center mine wilfully permitted the flow of water from the Golden Center workings into the Pennsylvania winze are the affidavits of F. W. Nobs, vice president of the Empire-Star Company, J. R. C. Mann, general manager, Hopkins R. Fitzpatrick, engineer for the company, and Elton B. Taylor, Empire-Star miner, formerly an employe of the Golden Center.

The affidavit of General Manager Mann reveals Pennslyvania mine workers are in danger of their lives by the asserted action of the Golden Center.

Winze Unwatered

'In December, 1939," the affidavit reads, "affiant learned for the first time, through Hopkins R. Fitzpatrick ,assistant engineer of the Empire mine, of the statement made by Elton B. Taylor, former employe in the Golden Center mine, of the drill hole that had been drilled into the Pennsylvania workings. Thereupon, for the purpose of enabling said workings to be prospected and developed further, affiant caused No. 4. winze and stopes leading therefrom to be unwatered. This unwatering was completed in February, 1940, and disclosed a stream of water pouring into the winze from a drill hole in the hanging wall thereof.

"The drill hole," Mann continues, "was entirely in granite and not on any intersecting vein or lode of any kind or description, nor was any intersecting vein or lode exposed in the vicinity of the drill hole. Affiant also examined two other drill holes referred to, which appear to be recently completed, and the water pouring from said holes. Neither of said drill holes appear to be on any intersecting vein or feature of any kind, although the third hole, No. 3 hole, had intercepted a sliver of the Pennsylvania vein lying in the hanging wall of the stope, where it punched through. Affiant also examined the fragments of drill core found in the vicinity of said drill holes, and noted that they fit the diameter of the holes exactly.

Drilled From Golden Center

"In affiant's opinion said drill holes could have physically been drilled only from either the 1100 or 1650 levels of the Golden Center mine, in order to intersect the Pennsylvania workings at the point and with the dip at which they intersected it, and the large quantities of water flowing from said holes could only have come through them

(Continued on Page Two)

WPA TURNS DOWN GAULT BRIDGE IMPROVEMENT

City officials were today appraised that WPA headquarters in Marysville, for the third time, has turned down the Gault bridge project. The amount of money involved for labor in rendering this bridge safe, increasing its load capacity and widening it, was $6,000. However, WPA labor will be available for improving the following streets:

Clark street, just beyond the Gault bridge is to be widened to 26 feet. The present roadbed is only 13 feet. The old snags of trees on the east side of the street will be removed and the bank cut back along the Seaman property on the west side and a retaining cement wall built. It will require $200 to do this work.

At the intersection of Sacramento and Clark streets a corner is to be cut off the Seaman property and the turn shaped up to make it more convenient for motorists. It will cost $500 as there is a lot of rock to be removed.

A strip on the Lower Grass Valley road between Valley street and Sacramento street will be improved. Earth will be taken from the back of the lot of Dr. Stuart and placed opposite the site of the old brewery thus widening the street. This work will cost an estimated $600.

Grading is to be done on Reward street just past the new Miners Hospital. The work will be carried as far back as the ravine and the street will be widened. Thsi project is estimated to cost $300.

The "hump" at the junction of the Tahoe Ukiah highway and Willow Valley road at the Nevada City city limit is to be removed. It will take off five feet of earth and rock in front of the home of Dr. A. H. Tickell. This is a much needed improvement as it is a bad junction for motorists. Several accidents and narrow escapes have occurred there.

Plans are to spend $200 on Court street which is between Main and Coyote streets. The work will be carried out for a distance of 150 feet and make it a through street. The main work will be back of the home of Rev. P. J. O'Reilly.

DIVISION OF POSTS IS DISCUSSED BY VETERANS COUNCIL

Eighty five members and visiting veterans enjoyed a meeting Sunday in the Odd Fellows Hall when Golden Poppy Council met to discuss a division of the posts and forming a new group. It was decided to lay the matter over until a meeting May fifth. The Council is pulling for the national convention in Sacramento for either 1941 or 1942.

Grass Valley Bowlers Win in Elks Alley

The Grass Valley Elks bowling team won by twelve points over Nevada City Elks in the Elks bowling alleys Sunday afternoon.

Elks members from the Lava Cap mine served a delicious dinner to about one hundred and thirty-five persons. W. E. Wright also showed his travel pictures during the afternoon and they proved deeply interesting.

Fred Garrison ,superintendent of the state division of highways in the Sacramento-Woodland area, and Mrs. Garrison motored to Nevada City Friday evening and returned Saturday forenoon. Mr. Garrison was recently transferred from this district to the valley city.

The Man for the Place

A few weeks ago The News-Press ventured the opinion that what ailed the administration of government in California was that inferior men had gained high places.

Since that time, the parade of hearings, of alleged bribery, of dictographs, of rumored recalls, of discharge of capable men, has grown instead of diminished.

The News-Press, therefore, is still of the same opinion. It believes California will never be operated soundly and with a minimum of waste until able men are persuaded to be candidates for office, particularly that of governor, and elected.

It believes it knows a man who would fill the state's No. 1 job ably and well. That man is Dr. Robert Gordon Sproul, president of the University of California, whose residence a part of the time is in Westwood Hills, and whose activity on the campus and in civic life here are well known.

His record with the University is beyond reproach. As comptroller, as president he has made the University one of the best operated institutions of its kind, or any kind, in this country.

He is a man of undisputed ability, of dynamic energy, of judgment and tact. He has a reputation for "getting things done." The fact that private business has sought to lure him into its fold is proof positive of his ability.

Democracy needs men such as "Bob" Sproul. Democracy —California—will work. and work well for the benefit of all, if such a man is at the helm, and given a modicum of co-operation. Not the least of the advantages of a man of his calibre is that, if elected, he would be in a position to attract more able men to other key jobs, also essential.

It is high time for a "bloodless revolution." in California. It is time for apathy to be finished, for thinking men and women to insist upon able administration, to insist upon reduction of the spoils system to a minimum, and eradication of flagrant mismanagement.

Those who would see the restoration of sanity in government in California could do no better than to start a militant campaign to install Dr. Sproul as governor.

(Reprinted from the Westwood Hills News-Press March 15, 1940.)

The Facts About The Machine

The evidence in the case would be thrown out of any court in the land, but an idea still persists in some quarters that machines destroy more jobs than they make. As a result, even those in a position to know better are found declaring that something should be done to curb the machine—that perhaps a moratorium on invention should be declared.

Short-sightedness is responsible for this stand. It neglects the fact that it is in the periods of greatest machine development that the great increases in jobs and payrolls have been built up in this country, and that when this process has been slowed down, stagnation has been the result. In other words, it is through placing greater confidence in the machine rather than in curtailing machine progress that prosperity is to be found.

Some extremely relevant facts in this connection are brought out in a recent "New England Letter," published by the First National Bank of Boston, which points to the automobile industry as an outstanding example of machine progress.

"The machine," this publication declares, "creates many more jobs than it destroys. The number of persons employed directly and indirectly in the automobile industry today is about six times as many as the peak employment in the horse and buggy business, including the related lines of activity. It is estimated that over four-fifths of the inventions do not displace labor, but are used to lower costs and by thus broadening the markets provide increased employment.

"If the contention were true that new mechanical devices cause chronic unemployment, then in each succeeding decade a smaller percentage of the population would be gainfully employed. The facts are that during the period of greatest technological advance, from 1870 to 1930, the population of this country trebled but the number of workers nearly quadrupled and the volume of production increased about elevenfold.

"At present, employment is more nearly normal in those industries that are highly mechanized, whereas unemployment is greatest in lines where machinery plays a relatively small part."

The countless evidence of machine progress are apparent to anyone who looks at the record over the period of the years. But as long as there is misunderstanding, and as long as this misunderstanding is publicly uttered, it remains important for those interested in America's future welfare to emphasize the facts of the case.

Towards Job Regularity

A job in industry depends upon a number of outside factors. For instance, there are the seasons to consider; you can't sell many sleds in July, and December is a bad month for bathing suits. Sometimes, too, the vagaries of customers play a big part in increasing or decreasing the size of weekly payrolls.

For many years now, individual companies all over the country have tried to anticipate these factors in various ways in order that their employees could work more regularly and be more certain of their jobs. Some companies have found the task more difficult than others, but throughout industry a tremendous amount of progress has been made along this line.

Recently, the National Association of Manufacturers made available the most comprehensive study of employment regularization methods yet published. The report describes 35 techniques that have already been successfully used in various companies, and enumerates the benefits that result both for management and the employees when it is possible to make jobs more regular.

The publication of this study is particularly encouraging because it evidences the serious efforts of industry to do everything its power to solve this particular problem. The first step in solving any problem is finding out the facts about it—its extent, the difficulties it presents, and the methods that others have successfully employed when faced with these same difficulties.

That is exatly what has been done in the present case. And by bringing the basic facts on employment regularization to the attention of American industry as a whole, the N.A.M. report makes it easier for progress towards the stabilization of jobs to continue at a pace even more rapid than that maintained in the past.

This Land We Survey

What are people thinking about these days?

We're not interested at the moment in the movies about which they're enthusiastic, or their current opinion of the next-door neighbors. We have a more general and a more important question in mind:

What are people—Americans, we mean—thinking about this America of ours?

To those who seek an answer, two resent magazine surveys make fascinating reading. One was concerned with the opinions of Americans in general, of all types and classes. The other dealt with a group whose opinion will be so important in the near future, the youth of the nation.

Here's a brief summary of the findings in these two surveys:

The first, conducted by Fortune Magazine, shows that the depression of the "thirties" hasn't damaged the American spirit. It indicated that a majority of Americans of all groups "think that they are better prepared to succeed than their parents were, that their chances of success are better, and that their son's chances will be still better." And "seventy per cent felt that they have an obligation to pass on to the next generation: better living and social conditions. a higher standard of citizenship, more education, better health."

That's encouraging news about the whole body of Americans. But what about young people? Don't we hear it frequently maintained that youth looks upon the present with a jaundiced eye?

Scholastic Magazine investigated this situation, asking a number of questions among high school boys and girls. And here's the gist of their replies:

"We have confidence in ourselves, place real value on our talents, and have faith in the future of our country."

Nine out of ten of those questioned believed that the best cure for individual unemployment or for a job in which they didn't fit was further preparation on their own part.

Faith in one's own ability and the recognition of opportunity have always been the main characteristics of American. They have accounted for our remarkable progress in times past.

In the light of these two surveys and what they show concerning Americans of all types, there is no reason why we should not look forward to continued progress in the years that lie immediately ahead.—Contributed

Washington Snapshots

By JAMES PRESTON

A new come-on for farmers and small businessmen has quietly been prepared by some of Washington's New Deal economists. It is another plan to boost the nation into prosperity by going further into debt.

Only time can tell whether these theoreticians will succeed in their efforts. The interesting fact is that after eight years of trying their ideas they still won't be downed, despite the fact that the nation's debt is still growing and that more than nine million people are unemployed.

The new proposal is largely a modification of the spend-lend idea rejected by Congress a year ago. This time, however, instead of being presented to Congress as one plan, it is to be broken up into section and submitted piecemeal. It won't look so big then.

The come-on bait to farmers and small businessmen, of course, will be that the present business recession is serious and that it will get worse unless the government goes in for pump-priming. It will be contended that the farmer and the businessman will be able to sell more of their goods if the government puts money into the hands of the unemployed.

But several fallacies in that argument are pointed out by other more moderate New Deal economists. First, they say without hesitancy that the current recession will be over by May and that 1940 as a whole will be a better year than 1939. Thus, they say, pump priming, even if it did good, would be unnecessary.

And a number of these Washington economists point out that when money is taken by the government for pump-priming it comes, of necessity, out of the incomes of those who have it. It is a well known fact, they say, that there aren't enough wealthy people to bear the burden and the load, therefore, must be put upon the financial middle class, namely farmers, small businessmen and whtie collar workers.

The extremists argue, of course, that borrowing isn't bad because it simply constitutes a mortgage on the future which will be paid off when times get better. But the others retort with the important fact that today taxes amount to 21 cents out of each dollar of income against about 12 cents in the 20's. And, they add, in the 20's everybody was making money so they were in a much better position to pay the taxes.

Speaking of jobs and better business, there is a case now pending in the courts which illustrates an unwholesome attitude that exists in some Washington quarters.

The case involves a lumber company which was accused by the National Labor Relations Board of some unfair labor practices. It was ordered by the board to pay some $150,000 in back wages to former employees who allegedly had been discriminated against and discharged because of union activities.

The company took the case into court, insisting that it would have to sell everything it owned and then go out of business entirely if it paid this $150,000. Such a move of course, would deprive men now working of their jobs.

The court, over the board's protest, has taken a more reasonable attitude and designated a third person to determine how much the company could pay without going out of business.

The Labor Board, incidentally, has just been disclosed as another Washington agency which pulls with its left hand and pushes with its right.

So-called "company dominated" labor unions have been anathema to the Labor Board and to the Labor Department. They have even issued a list of "characteristics of a company-dominated union."

In hearings before the Smith Committee it was disclosed that there is a union of Labor Board employees. And the interesting fact is that it does a lot of things which are described as characteristics of a "company-dominated union."

For example, its dues are 25 cents a month. The Board and Labor Department have taken the position in the past that any union which collects such small dues cannot really be free from employer domination.

Other things which the Board has proscribed, but which the Board's union do include these: They have used Labor Board stationery; they post notices on the Labor Board bulletin board; they hold meetings on Labor Board property; they discuss and conduct union business on Labor Board time; Board officials have spoken to Board employees at Board union meetings.

Thus things which the Board condemns in other unions it condones in its own. "The employer can do no right, but the Board can do no wrong."

UNDERGROUND

(Continued From Page One)

if said water had been artificially induced into the holes at the top.

"Affiant considers that the continued injection of water into the holes, whether its flow is temporarily stopped, as has been done by men under affiant's direction, or not, constitutes the greatest danger for the Pennsylvania mine workings and the men employed there; first, because water in the said drill holes under such pressure would tend to percolate and infiltrate into the surrounding country rock and cause blocks of it to soften and fall into the stopes and winze; second, because continued injection of such large quantities of water have caused and will continue to cause heavy pumping expense to the operators of the Pennsylvania mine for handling water which would not otherwise naturally flow into said workings.

Lives Endangered

"Affiant has also been advised of and heard the blasting going on in some working, apparently come down from about in the vicinity of No. 4 winze on the 2400 Pennsylvania level, and states that said sounds indicate that said working is approaching dangerously near to the Pennsylvania ground; that if the workings should break through into said ground it would endanger the lives of men employed there and cause great damage to the Pennsylvania mine from the inflow of water,

"That during the time affiant has been assistant manager and general manager of the Empire mine properties," Mann's affidavit states, "no one connected with the Golden Center mine has, either directly or indirectly, advised affiant of the construction of said drill holes or of said workings in the direction of the Pennsylvania 2400 level or given to affiant any reason or excuse whatever for the aforesaid incident.

"Affiant has caused the flow of water through said drill holes to be measured. The affiant has calculated the additional cost of pumping the water from said No. 4 winze to the surface, since December, 1936, when the first of said holes is stated to have been constructed, and estimates the cost of such additional pumping, which has been caused plaintiff by the injection of the water, amounts to the sum of $6,500.

Additional Expense

"That if the water continues to flow into the Pennsylvania, either through the holes or through the country rock under pressure from the water in said drill holes, an additional monthly expense, dependent upon the amount of water flowing into said mine, will be caused by the necessity of pumping said water to the surface where it can be disposed of. This expense will continue indefinitely unless the injection of the water into said drill holes cease.

"That by reason of said No. 4 winze and stopes being full of water below the 2400 level up to February, 1940, affiant had no opportunity or occasion to suspect the existence of these holes or of the fact that the water flowing into said level from said winze was being artificially injected from other workings above.

"Affiant further states that the exact location of said winze, which threatens to break into Pennsylvania workings, and of the collar of said drill holes, can only be ascertained through a survey, measurement, and examination of the drifts and cross cuts on the 1100 and 1650 levels of the Golden Center mine. That affiant would be glad to cause such survey to be made, if an order for the same should be obtained from the court."

Fitzpatricks' Affidavit

The affidavit of Engineer Fitzatrick reads in part:

In the Autumn of 1936, not long after affiant came to the Empire mine, affiant noticed a considerable flow of water on the 2400 level in the Pennsylvania mine. At that time affiant was working as a miner in the No. 4 stope above the level and had occasion to pass through the same daily. All of the workings below said 2400 level were flooded and affiant was unable to notice the source or cause of said heavy flow of water but assumed at the time that it came from excessive natural

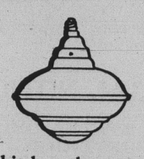
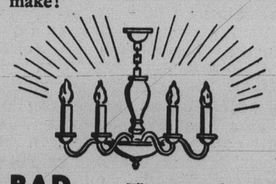
Pin-Money can buy BETTER LIGHT!

For handy light, out of the way, tacked up just where you want it over bed, dressing table, telephone, sewing machine or in the children's room, you'll find these new wall lamps just the thing. Very inexpensive!



Is your kitchen gloomy — full of annoying shadows? Take out the old bare bulb or heavy old-style fixture. Screw in a smart modern opal glass adaptor bowl. What a tremendous difference it will make!



BAD . . . These eye-killing dining or living room fixtures like the one above. Such fixtures produce raw light—bright and glaring unless bare bulbs are covered with attractive translucent shades.

GOOD . . . These adaptor shades that clamp onto lamp bulbs. Glare is changed to eye comforting light. They make old style fixtures look smart and modern.

★

You do not have to spend a lot of money to modernize and improve your lighting. There are many lighting devices on the market now that will bring your present lamps and fixtures up-to-date for a very few dollars.

CAMPTONVILLE NOTES

CAMPTONVILLE. March 18.—Charles Percy, Mr. Montgomery, Sr., Miss Maxine Montgomery, Mrs. Jessie D. Olson, and Miss Cora Olson arrived Tuesday from Los Angeles where they spent the week end. Miss Maxine Montgomery who returned with them spent the winter months with relatives in the south.

Mr. and Mrs. H. A. Benthusen and family of Sacramento accompanied by Mrs. Emma Phillips was in town Monday on a short visit to their old home here.

Warren Pauly returned to Marysville Monday to resume his school work after spending the week end with his parents here.

W. H. Clarke returned from Nevada City Wednesday where he went for medical attention for an eye injury.

Luke Howe of Sacramento, attorney for Stokes in the Stuart murder case, was in this section on business Tuesday.

Mr. and Mrs. Frank Meggers motored to Marysville Thursday to attend the funeral of the late Bertram Stuart.

Charles Percy and J. O. Montgomery left Thursday for San Francisco on a brief business visit.

Leonard L. Bishop motored to Nevada City Thursday on a brief visit, to see his mother Mrs. John Ramm who is seriously ill at the home of Miss Emma Ramm.

The Pinochle Club held a regular Saturday evening meeting on March 9, at the home of Mrs. William A. Lang with the following members present: Mrs. Olive Groves, Miss Lydia Groves, Mrs. Samuel Price, Miss Elsie Price, Mr. and Mrs. William Hembleben, Herman Clendennen and the hostess, Mrs. Lang.

V. F. W. Auxiliary Initiates Four Candidates Friday; Staff Officer Is Guest

At a regular meeting of Banner Mountain Post, V. F. W. Auxiliary Friday evening in the veteran's hall four candidates were initiated into the order. An unusual and impressive feature was the initiation of two daughters, Mrs. Lucille Johnson and Mrs. Blanche Hatch, by their mother, Mrs. Will Young, president of the auxiliary. The other two members were Alice Rowe and Mrs. McDonald.

There were twenty five present to greet Ruth Eastman, assistant staff officer and several friends from Knights Landing. An Easter and St. Patrick's decorative theme was carried out on the table and in the hall. Refreshments were enjoyed at the close of the evening.

BERKELEY PLANS CELEBRATION OF CHARTER GRANT

Every campus of the University of California will join in the observance this month of the seventy-second anniversary of the granting of the charter to the institution. President James Bryant Conant of Harvard University will be the speaker at the celebrations on the Los Angeles and Berkeley campuses.

The week opens on March 24 with the Charter Anniversary broadcast of the University Explorer over the blue network of the National Broadcasting Company at 9:45.

On Monday the public exercises will be held on the Los Angeles campus, in Royce Hall Auditorium, at 10 o'clock. President Robert G. Sproul will preside with Dr. Conant as the speaker. The Alumni Banquet is planned for that night. The faculty research lecture will be given in Berkeley on Tuesday night, by Dr. George D. Louderback. On Wednesday, alumni of the Medical school will gather for a celebration and program in San Francisco. On Wednesday afternoon Dr. Chester Rowell will speak at the celebration on the Davis campus. Dr. Howard S. Fawcett of Riverside, will deliver the faculty research lecture Wednesday evening in Los Angeles.

Dr. Conant will speak in the Greek Theatre Thursday morning, and again at the alumni dinner in San Francisco that night. Dr. Sproul will preside at the morning meeting, and speak at the dinner.

On Friday, from 7 until 9 o'clock, there will be a demonstration of telescopes at Mt. Hamilton. From 3 until 5 o'clock will be open house at the Scripps Institution of Oceanography, La Jolla. From 2 until 10 p. m. will be open house at the new University Press Building, Berkeley.

On Saturday will be an open house from 9 o'clock until noon on the Riversidre campus. On Sunday there is to be a horse show and exhibit of purebred Arabians at the Kellogg Institute of Animal Husbandry, Pomona.

Caller—"Are you certain the manager is not in?"

Office boy—"Say, do you doubt his word?"

TRANSAMERICA NET EARNINGS REVEALED BY ANNUAL REPORT

The consolidated net profit of Transamerica Corporation and all domestic subsidiaries for the year 1939, after provision for taxes and minority interests, was $7,443,671.96, it is revealed in the audited annual report released today. This is equivalent to $0.694 a share and compares with $7,039,681.00, or $0.657 a share for the year 1938, and is exclusive of Transamerica's proportion of the net profit of Bank of America N. A. & S. A. and of the National City Bank of New York (in both of which the corporation owns a substantial interest) in excess of the dividends paid by those banks during the year.

In the letter to shareholders accompanying the annual report, John M. Grant, President. said:

"Your corporation had capital funds of $83,101,195 at December 31, 1939. It should also be noted that there was a net appreciation of $4,772.767 over the carrying values of 'other security investments' and $6,515,325 excess of adjusted net asset value per books over carrying value of the domestic corporations and banks listed on the balance sheet under 'investments in capital stocks.' No consideration has been given in the calculation of adjusted net asset value to the value of insurance in force with Occidental Life Insurance Company or to the equity in the unearned premium reserve of Pacific National Fire Insurance Company."

Dick Fisher, former resident of Coyote street, left for Hercules Wednesday after spending a few days in this city visiting relatives and friends.

Jess Moomey and family of Cottonwood spent the past week end in Nevada City with his parents, Mr. and Mrs. Ed Moomey of Boulder street.

C. M. T. C. CAMP WILL BE HELD JULY 2 TO 31

PRESIDIO OF MONTEREY, Mar. 15.—Stressing the importance of early preparations for enrollment in the Citizens' Military Training Camp at Monterey, Colonel Homer M. Groninger, 11th Cavalry, Camp Commander, officially announced today that the camp would be held from July 2, to July 31.

Tentative quota for the Presidio has been set at 1145, not including Regular and Reserve Officers who will train the candidates. This enrollment establishes Monterey as the largest C. M. T. C. post west of the Mississippi.

Quota Is Divided

To insure equal opportunities for enrollment this quota will be apportioned among 58 counties of California and the seven western counties of Nevada on the basis of money available for transportation.

Since the primary purpose of this camp will be to make better citizens through physical and mental development it is desired to permit every community an opportunity to be represented, Colonel Groninger announced.

Three Courses

Courses to be given this year include Infantry, Cavalry, and Field Artillery. Although no military obligations are incurred by attending camps, successful candidates who complete the fourth or Blue Course will be eligible to be commissioned as Second Lieutenants in the Officers Reserve Corps of the Army of the United States.

Offering a well rounded month of summer recreation and training in cool, historic Monterey, the camp will be open to all young men between the ages of 17 and 24, who are accepted by local M. T. C. A. Commissioners, as well as former candidates. All necessary expenses, including transportation, food and clothing will be paid by the government.

Wife—"I think married men should wear something to show they're married."

Husband—"I do—this shiny suit."

Customer—"Five years ago I could have bought these prunes for fifteen cents a pound."

Grocer—"Not these prunes. They are only two years old."

● *Back when Hector was the proverbial pup the air was thick with riddles. Today they've been streamlined into the modern quiz. Here's a fresh one for you to try. Read the question, indicate choice of answer in space provided, check for correctness, then tally score for your rating.*

(1) In the course of an average day, you being an average American, are served food weighing: (a) 2 lbs., 8 oz., (b) 4 lbs., (c) 1 lb., 11 oz., (d) 14 oz. ☐

(2) In the good old days both Athens and Sparta attempted population control by: (a) offering human sacrifices, (b) exposing children to perish, (c) transplanting inhabitants in East Africa. ☐

(3) You've heard plenty about these three tiny Baltic nations. Which one is in the middle? (a) Lithuania, (b) Estonia, (c) Latvia? ☐

(4) *Mark this statement true or false:* "The United States has more miles of railroad trackage than all European countries combined." ☐

(5) A slide rule is: (a) baseball regulation regarding player's right to slide into second base, (b) stock market regulation regarding amount of price drop permitted in any one session, (c) an instrument of calculation. ☐

(6) Most densely populated country in Europe is: (a) Belgium, (b) France, (c) Germany, (d) Italy. ☐

(7) The average ship can pass through the Panama canal for a fee of: (a) $300, (b) $1,000, (c) $4.000, (d) $500. ☐

"GUESS AGAIN" ANSWERS	Tally Score Here
1. (b) scores 15 pts.	
2. Tougher, eh? (b) 20 pts.	
3. Add 20 pts. for (c)	
4. For your (true) guess, 10 pts.	
5. Plus 10 more for (c)	
6. Little Belgium (a), 10 pts.	
7. 15 pts for $4.000—(c)	
YOUR RATING: 100 pts., practically impossible; 90, highly incredible; 80, mighty good; 65, average.	TOTAL

Husband (arriving home very late)—"I'll bet you can't guess where I've been."

Wife—"I can, but go ahead with your story."

(Continued from Page Two)

percolation from above.

On or about the 9th day of February, 1940, affiant was requested by J. R. C. Mann, manager of Empire Star Mines Company, Ltd., properties, to visit said workings in the Pennsylvania Mine on said 2400 level and ascertain, if possible, the cause of the heavy flow of water which seemed to be coming into the winze and stopes below said level while the same was being unwatered. Affiant thereupon took charge of said unwatering operation and installed two 300 gallon per minute electric pumps, one 200 gallon per minute air pump and one sponge pump. It took nine days with all of said equipment to completely unwated said workings.

Detailed Inspection

On February 13th, 1940, affiant entered the upper part of said workings and made a detailed inspection thereof. He found a diamond drill hole about one and one half inches in diameter delivering a heavy stream of water directly into the center of said winze. Later he inspected about six inches of the core which had broken off at the bottom of sair drill hole and had fallen on to the floor of the winze beneath. Affiant made a survey of the general direction of said drill hole and ascertained that it dipped at an angle of 86 degrees from the horizontal in a southerly direction. Affiant had a standpipe made with a screw valve on the bottom ,and after a great deal of difficulty and with the aid of employes, succeeded in shutting off the flow of water from said drill hole on Wednesday, February 14th, 1940.

"On Sunday, February 18th, 1940, at 12:15 a m. a similar flow of water suddenly started to come through another drill hole which affiant had not previously seen in the roof of said workings. The flow of water from this second hole, which affiant designates as No. 2 drill hole and which is 2 inches in diameter, was larger, and water flowed with a greater force than it had originally come from the first, or No. 1 drill hole. Neither hole was in any vein formation, but came through the granite roof of the winze and stope. Affiant succeeded in shutting off the flow from said No. 2 hole in the same manner as with No. 1.

Third Hole Found

Two days later, on February 20, 1940, affiant heard a roaring in the hanging wall of said drift, and pulling down some overhanging, found a third hole, which affiant hereafter designates as No. 3 drill hole. This was northwest, about 20 feet, from the No. 2 hole in the roof fo the stope, and had loosened a slab of the roof without entirely pushing it off. At the time affiant discovered said No. 3 hole, apparently no excessive amount of water was flowing from the roof at that location, but after affiant succeeded in shutting off the flow of water from the No. 2 hole, a large amount of water came through the roof of the drift at the laction of said No. 3 hole and flowed out with a great force as soon as affiant loosened a slab in the roof of said stope.

Affiant found in said slab loosened from the roof of said stope the end of a drill core and the impression showing where the drill pipe had stopped revolving. Following the discovery of said No. 3 hole, affiant noticed that the water pressure of the water flowing from there came with increased speed. At one time it ceased for two periods of twelve minutes each, indicating to affiant that some artificial manipulation of the stream was taking place from above. No. 3 hole was one and one half inches in diameter. Affiant measured the same and ascertained that it dipped 70 degrees from the horizontal in a southerly direction. No. 2 hole, like No. 1 hole, had come through the granite hanging wall of the stope. The No. 3 hole bottomed in a small slab of quartz which was a part of the Pennsylvania vein passing through the stope.

Blasting Heard

Affiant has been in said workings leading downward from the said 2,400 level of the Pennsylvania mine at all times of the day ,and has listened for indications of any working in that vicinity. Affiant states from this listening observations that it is at about 3:30 o'clock in the morning of each day that blasting can be heard in the rock above the winze, and from his experience as a mining engineer in observing the transmissibility through rock of blasting sounds, affiant estimates that the working where said blasting is being done could not be more than 100 feet above said 2400 drift. Plaintiff has no workings in such a location, and if a winze had been sunk vertically from either said 1100 or said 1650 level in the Golden Center mine it would be approximately at that location. At times the reverberations from the blasting were so loud as to cause small bits of rock to split off in the Pennsylvania workings. In affiant's opinion, said working—whatever be its character—is within the vertical boundaries of Lots 6 and 7 of Block 18, Grass Valley Town site, and if it is continued in a downward direction will surely intersect the workings at or below said 2400 level in the Pennsylvania mine. If said working should break into said Pennsylvania mine a very dangerous situation would exist, because no notice of such blasting has been given to any of the officers or employees of the plaintiff, and there would be grave danger of men being crushed or injured if the workings break in while they were on shift. Said flow of water into said drill holes also causes a dangerous condition. Because of the pressure above, even though said flow of water has been stopped by the operations of affiant and his assistants, some of it percolates through the rock under pressure and is apt to cause waste rock to fall into the stopes and to cause a movement to the ground, all of which is highly dangerous to men engaged in operations in that vicinity.

Affiant also measured the flow of water from said drill holes before causing the same to be shut off. No. 1 hole was making 86.25 gallons per minute; No. 2 hole was making approximately 200 gallons per minute and No. 3 hole was making approximately 100 gallons per minute.

CONTROLLER SAYS CASH DEFICIENCY DOUBLES IN 1939

State Controller Harry B. Riley annouced in Sacramento today that the State of California, despite increased revenue, has more than doubled its General Fund cash deficiency in the past year.

The cash deficiency stood at $68,094,925 on February 29 last, the end of the first eight months of the fiscal year, 1939-40, as compared with a deficiency of $30,711,386 on February 29 of last year, Riley said, an increase of $37,383,538.

Registered warrents ontstanding totaled $79,370,217 at the end of the first eight months this fiscal year, in increase of $46,953,376 over the $32,416,841 figure of February 28, 1939.

This unbalanced condition of State finances occurred despite the fact that revenue for the first eight month period just ended was $6,368,540 greater than for the corresponding period last year. Revenue for the period ended last February 29 totaled $118,058,743 as compared with $111,690,203 in the first eight months of 1938-39.

Aurora Chapter, O. E. S. of Grass Valley is celebrating elective officers night this evening. Among members from Evangeline Chapter of this city who will attend are Mrs. Margaret Bosworth, Mrs. E. Lawrence, Mrs. Doris Foley and Miss Ruth Tamblyn.

Holmes Funeral Home ambulance service moved Mrs. George Miller and infant daughter from the Nevada City Sanitarium to their home on Sacramento street this forenoon.

Madame-

WE HELPED BRING THAT NEW

Easter Bonnet

YOU WILL WEAR NEXT SUNDAY!

That fetching frilly creation you bought was a New York production of a very smart Paris style. Every woman wants her Easter Bonnet for that particular day. It is essential that "on-time performance" be given.

Your store keeper took no chances. This gay bit of lace and ribbon was carefully packed and ordered "Railroad Express-Air route." Your Easter bonnet took wings across the country, racing with the sun.

Your railroads followed this shipment through to its destination through their subsidiaries. Railway Express is an important link in railroad service. The Nevada County Narrow Gauge Railroad speeded this shipment to your genial and accommodating Railway Express Agent. He, in turn, saw that it was delivered to your merchant immediately. Few hours had elapsed from the time it left New York until it was meeting with your approval in Grass Valley and Nevada City.

East is East and West is West but the twain DO meet—and it's the railroads that bring them together.

H'GH SCHOOL NOTES

By BARBARA PHARISS

The first six week's period in the second semester ended a week ago. Miss Rector gave the following list of students who qualified for the C. S. F. or the ten-point honor roll. C. S. F. members are Ruth Mitchell, Mary Libbey, Mary Innis, Elsie Schreiber, Elizabeth Lavalley, Ella Yuen, Helen Yuen, Amy Chan and Wayne Feathers; honor roll, Dick Pease, James McCraney, Helen Jackson, Erica Benizzi, Leona Scriven and Betty O'Connor.

Friday morning the ski club thrilled the assembly with ski pictures taken in the Austrian Alps. As there are many ski enthusiasts in this school, the pictures were greatly enjoyed.

W. C. Carter, engineer on the Santa Fe railroad, and Mrs. Carter of Los Angeles visited Carter's uncle, A. Carter, and cousin, George Carter, during the past week end. W. C. Carter was born in Virginia City and enjoyed the showing of the film "Virginia City" in that city Saturday.

Treasure Island Prepares For Opening Day, May 25

TREASURE ISLAND ON SAN FRANCISCO BAY, March 18.—With May 25, opening day of the 1940 Golden Gate International Exposition only a little more than two months off, activity on Treasure Island this week reached a high pitch, with hundreds of workers engaged in plastering, landscaping and general refurbishing in anticipation of the event.

During the past week Portugal signed up for participation in the 1940 exposition season, being the second major European nation to arrange for representation on Treasure Island. Previously Italy had agreed to participate this year. Other major nations of Europe were expected to announce their participation within the next few days.

Exhibitors Increased

At the same time the list of large exhibitors was increased during the week when Westinghouse Electric and Manufacturing Company signed contracts for exhibit space in the Palace of Electricity and Communication. The corporation, which was a 1939 exhibitor, is increasing its space by 25,000 square feet.

The Westinghouse exhibit will include "Willie Vocalite", a performing electrical man; television demonstrations, a motion picture threatre and new action displays of industrial and home appliances.

Boy Scout Day

Announcement also was made during the week of Boy Scout Day, to be held July 6. The day will be sponsored by the San Francisco Council of the Boy Scouts of America, which is arranging for an elaborate display in the Vocational Palace. The display will feature the activities of the Boy Scouts of the far western states, being devoted to every phase of scouting.

Work was started during the week on the Temple of Religion and Tower of Peace, which is to be entirely remodeled for the 1940 season. Dr. Richard E. Shields, of San Francisco, has been appointed executive director of the temple and is in charge of a large crew of workers.

Vesper Services

The building will be entirely redecorated and the grounds about it newly landscaped. Dr. Shields announced that vesper services will be held every Sunday at 5 p. m. during the 1940 season.

Major development in the entertainment field during the past week was the preparation of a contract for the Billy Rose Acquacade, feature attraction at the New York World's Fair of 1939. Rose anticipates remodeling International Hall for an Acquacade pavilion and installing a huge tank. The work probably will be started within the next week or ten days.

Negotiations also are under way for the Clyde Beatty Wild Animal Show, declared to be the most sensational show of its kind in the entire world.

These two, combined with "America! Cavalvade of a Nation." The Folies Bergere, and the Hollywood Show, depicting in detail the making of a modern motion picture production, assure a season of entertainment such as few expositions ever have had.

Former High School Principal Visitor Here

Eugene H. Barker, who, subsequent to his graduation from the University of California in 1893 became principal of the Nevada City high school and held that post until June 1906, was a visitor in Nevada City during the week end. Pleasant memories were reviewed with his former pupils. He is now in the Washington school in San Francisco. Mr. Barker is the author of several books on mathematics used in secondary schools and in colleges. He is now engaged in writing a book of outdoor stories for youngsters. He was attracted to this endeavor by the interest his grandchildren reveal in natural science. With next year he will have completed his fiftieth year in the teaching profession.

John Pizani, who suffered a severe cut on an arm in a mine accident near Auburn, recently, and wife are spending some time at the home of her parents, Mr. and Mrs. George O'Neil.

NEW LOVE DRAMA HAS GREAT CAST OF TOP PLAYERS

Leslie Howard, Ingrid Bergman and Edna Best are the starring trio in David O. Selznick's new romantic drama, "Intermezzo, a Love Story," which begins a two day engagement at the Nevada Theatre on Tuesday through United Artists release. The strong cast supporting the stars includes John Halliday, Cecil Kellaway, Eleanor Wesselhoeft, as well as the two well known juvenile players—Ann Todd, aged six, and Douglas Scott, aged thirteen. The latter named pair portray the roles of Leslie Howard's and Edna Best's children in the production.

"Intermezzo, a Love Story" is a drama about a great violinist, who in remembering his youth and the happy days when he was first married, believes that he has fallen in love again with a younger and more beautiful woman. He persuades her to become his accompanist on a triumphant concert tour, leaving his family behind while he and his sweetheart travel all over Europe. After months of gay and exciting living in all the capitals of the continent, the pair suddenly realize that they cannot go on drifting through life. How they solve their problem and the girl's course of action provide a thrilling and poignant climax.

Adenah Camp Fire Girls and their guests will have an Easter party at Seaman's Lodge this evening. The party will start at six o'clock and plans have been made for a delightful time.

TRAFFIC WHYS

By CHIEF E. RAYMOND CATO, California Highway Patrol

Traffic questions should be forwarded to Chief Cato at Sacramento. Answers will appear at an early date.

Question—Is there any particular way in which license number plates should be placed on an automobile? Please tell me what laws cover that subject. P. F. M.

Answer—There are quite a few sections of the Vehicle Code which refer to that important subject. Most frequently to be considered by the average motorist are:

Plates must be attached one to the front and one to rear of vehicle. Must be attached not less than sixteen inches from the ground, securely fastened so they will not swing, and clearly visible and free from foreign matter.

Rear plates must be visible during times lights are turned on at a distance of fifty feet.

Bumper guards must not obscure any part of plate at any time.

Question—I am interested in manufacturing and selling a radiator ornament, shaped like a monoplane, which shows a red light to the rear, warning the driver when he operates the car over 50 miles an hour. Is there any provision in the law governing this? I. A. M.

Answer—You must consider carefully Section 683, of the Vehicle Code regarding radiator ornaments and other sections of the Vehicle Code concerning the colors of lights on vehicles. The provisions of the Vehicle Code are such as to discourage ornaments, particularly ornamental lights. This office is fully in sympathy with such provisions of the Code and would recommend against both the manufacture and use of ornaments and ornamental lights on vehicles.

First golfer—"You careless idiot! You almost hit my wife."

Second golfer—"Did I? Well, you may have a shot at mine over there."

ENJOY PREMIERE

Marvin Crabb, Miss Faydene White and Mr. and Mrs. Franklin White spent Saturday in Reno and Virginia City enjoying the premiere showing of the film, "Virginia City" showing Virginia City in the 1860's during the great silver and gold boom days. There were throngs of people in both cities for the big event and even though the weather was cold, the party felt the trip well worth while.
